

DATASHEET

Captaris RightFax Family of Products North America

RightFax Enterprise Fax and e-Document Delivery Solutions

OVERVIEW

The Captaris RightFax family of products provides easy-to-use, easy-to-manage enterprise fax and e-document delivery solutions that integrate and automate the flow of a full range of fax, paper and electronic documents and data.

RightFax seamlessly integrates with desktop, email, CRM, ERP, imaging, document management and other essential business applications to efficiently and securely send and receive any document from virtually any application within an enterprise via fax, email, print devices or the Internet.

RightFax Enterprise Fax for the Desktop

RightFax enables businesses to increase employee productivity by automating fax delivery of user-created documents; reduce costs by eliminating manual faxing, paper, phone lines and fax machines; and improve customer service by providing secure, confirmed and immediate document delivery.

RightFax Universal Information Exchange Integration Solutions for Back-office Automation

RightFax Universal Information Exchange (UIX) integrates with a variety of applications, including email, desktop, CRM, ERP, document management, imaging and scanning devices to make exchanging information electronically simple. No other solution on the market today has such an impressive list of certified integrations with leading business software applications. Designed to be flexible, Captaris provides a comprehensive line of products to meet information exchange needs no matter how big or small the enterprise. Companies can start small and add capabilities as their information exchange needs expand.

Captaris helps companies reduce costs, improve user productivity and enhance internal and external communications every day. That is why RightFax is the market leader in enterprise fax and e-document delivery, with over 70,000 installations globally and a market share nearly three times higher than the next leading vendor. Today, RightFax is installed in 93 of Fortune 100 companies in 44 countries, and is the preferred fax and e-document delivery partner of leading technology companies including Canon, FileNet, HP, IBM Lotus, Microsoft, Oracle, SAP, Siebel and Xerox.

RIGHTFAX ENTERPRISE FAX SERVER SOLUTIONS

Automate Network Fax Delivery from the Desktop

RightFax allows users to send, receive and manage fax documents directly from any desktop application. It replaces excess phone lines and fax machines, enabling organizations to consolidate resources and reduce costs while enhancing productivity and streamlining business information delivery. Feature highlights include:

- Intelligent outbound fax delivery including call grouping, scheduling, priority sending and human-answered fax
- Intelligent inbound fax receipt, routing and management including smart distribution and auto reply support organizational workflow
- Flexible and scalable platform allows organizations to easily expand channel capacity, conduct load-balancing, upgrade servers, add modules and much more
- Microsoft Windows 2000/2003 architecture and provides the robust engine required for handling even the most demanding document delivery needs
- Out of the box support for Microsoft SQL Server 2000 Desktop Engine (MSDE), in addition to support for Microsoft SQL Server 2000 Standard Edition
- Microsoft Windows 2003 Standard Server and Enterprise Server certified
- Supported on Microsoft Office XP and Microsoft Windows XP platforms
- Seamless phone book integration including LDAP, ODBC, Active Directory and more
- Enterprise Fax Manager (EFM) enables administrators to easily manage users, groups, printers, least-cost routing, and other fax system functions
- Built-in intuitive client, FaxUtil, allows users to view, print and manage their faxes
- Built-in SMTP email gateway that supports any SMTP-based email system
- Built-in short messaging services (SMS) gateway supports bi-directional SMS messaging in the RightFax mailbox
- Integration with multifunction devices to consolidate faxing, printing, scanning and copying on a single device
- Flexible, customizable cover sheets allow better control, routing, security, tracking and personalization of faxes
- Integration tools including APIs and embedded codes allow for easy and rapid customization
- Secure binary file transfer (BTF) feature that disallows T.434 file transfer between fax boards
- Extensive dialing rules provide rules and restrictions for fax sending, giving precise control over outbound faxing
- Do Not Fax and Do Not Dial options enhance security and block unsolicited fax sending
- Comprehensive administrative and reporting tools

RightFax Business Server

- Ideal for company, department or workgroup levels
- Fax server that works independently
- Configurable fax workflow options including routing, automatic printing, scheduling, priorities, smart resume and more
- One channel license included, expandable to 30 channels
- Unlimited user licenses

RightFax Enterprise Server

- For national or global organizations that want to combine the power of multiple RightFax servers on their network
- Features Intelligent Least-cost Routing™, load-balancing, NT Security Authentication and supports cluster-aware installation
- Allows optional fax sending, receiving and management through an Internet browser
- Using OCR technology, converts static images into text files and recognizes characters on the first page of inbound faxes for routing documents to their intended destinations
- Includes a telephone user interface to remotely access and manage fax mailboxes
- Includes phone and Web-based fax-on-demand systems
- Allows companies to create and monitor more than 100 status alerts on servers, databases and gateways simultaneously
- Administrator pager alerts
- Configurable fax workflow options include automatic printing, fax aging, scheduling, priorities, smart resume and more
- One channel license included, expandable to 1,024 channels
- Unlimited user licenses

RightFax Satellite Server

- A specially licensed fax server and email gateway that works with a RightFax Enterprise Server (required) and leverages Internet or intranet connections
- For companies with separate workgroups or branch offices that need the full networking resources available from a main branch office
- Includes two channel licenses and two virtual port licenses
- Maximum 15 users

RIGHTFAX ENTERPRISE SUITE

- For national or global companies that want to combine the power of multiple RightFax servers on their network
- Bundles RightFax Enterprise Server with additional RightFax modules for increased functionality at an affordable price:
 - RightFax Microsoft Exchange Module
 - RightFax IBM Lotus Notes Module
 - RightFax PDF Module
 - RightFax SNMP Module
 - One channel license, expandable to 1,024 channels

UNLIMITED USER LICENSE RIGHTFAX UNIVERSAL INFORMATION EXCHANGE INTEGRATION SOLUTIONS

Automate Back-office Business Processes

- Brings efficiencies to organizations' workflow processes by automating the delivery and receipt of business-critical information and documents such as purchase orders, invoices, confirmations, loan approvals and many others
- Enables organizations to output documents and data from back-office applications without modifying the data stream
- Features data recognition, information assembly, information distribution and advanced reporting technology
- Extensive host connectivity options
- Functionality is customized for organizations by Captaris Implementation Services or an Authorized Captaris Partner

RightFax Business Integration

- Ideal for organizations with the following requirements:
 - Begin with one document form and expandable to two document forms for routine automated distribution
